

# GIA GREEMORE

## SCHOOL & AFTER

I am a business marketing major, and I am thinking about minoring in human resources. After I graduate, I'm not sure I am going to jump right into a "big girl" job because I want to move to Spain and teach English for a year or longer. After that though I will probably go into HR or some sort of recruiting position for a company.

## COMPUTERS

When it comes to computers, I would say I am slightly above a beginner level. Through many of my classes I have had to learn how to use mainly excel but also Microsoft office as a whole as well as google drive. However, I am currently trying to create something in excel that will help my sorority with the matching process we do during recruitment so hopefully after that I will be more proficient at least in excel.

## MORE ABOUT ME

As seen at the top of this page my name is Gia Greemore. I am from Sacramento CA and I am currently a junior here at UNR. I don't really have too many hobbies, but I use to play competitive volleyball for 10 years so when I get a chance to play recreationally, I always take it. But what takes up most of my free time now is my sorority I recently got elected to the position of Vice President of Recruitment so if I'm not working on schoolwork you can probably find me on my computer obsessing over that. If I need break from the stress, my go to stress reliever is cooking. I love making new things and trying new foods. Actually, this summer I plan on going aboard to Italy for a month where I will be taking an Italian cooking class. I think the biggest about me is I just live one day at a time I don't stress too much about the big picture or the far out future. I'm very much a I'll figure it out when I get there kind of person and so far it's worked pretty well for me.
